September 2017

Dear Fernando,

Whitford Recommended Coater Program, maintaining excellence in coating standards

In recognition of your excellent and consistently high standards in the application of Whitford coatings we are delighted to present you with a renewed Whitford Recommended Coater (WRC) plaque.

The WRC Program recognises your past and continued loyal use of Whitford coatings, and in recognition you have become part of a select network with whom Whitford will continue to work in partnership.

Your Whitford Recommended Coater accreditation is valid up to July 2019, at which time the intention will be for this to be reviewed. You will appreciate that gaining and then maintaining WRC status is prestigious and indeed many end users value this qualification when selecting their coaters.

We look upon the WRC as a partnership between our two companies and just as the maintenance of high quality standards is important, I am sure you will agree that Whitford would normally expect to be the prime or sole supplier of PTFE coatings to WRC customers.

In honour of this achievement we hope you will display this plaque proudly in your office or reception area.

Should you have any queries or need to discuss any points please contact Whitford directly at the address above or email me on sbutler@whitfordww.com.

Kind Regards

Stephen Butler
Global Business Director
